

Tutorial 8

Engineering Drawings

Outcomes:

- Ability to create a professional multi-view engineering drawing for any part or assembly.
- Ability to add different types of views to the drawing (3D views, orthographic projection views, auxiliary views, section views, etc.)
- Ability to add dimensions and annotations to the drawing.

Homework 8

For this homework you need to use the part named **HW8.prt**.

- Create a multi-view engineering drawing for the part as shown below.
- Add dimensions and annotations to the drawing as shown.
