26 th September 2000 to 31 st August 2003	Chairman of Accident and Emergency Department King Abdullah University Hospital Faculty of Medicine - Department of A&E Jordan University of Science and Technology

I am involved in teaching the under and postgraduate medical students the course of upper gastrointestinal surgery, including gastric and esophageal malignancies. In addition, I work as a consultant surgeon at King Abdullah University Hospital. In addition to performing general, upper gastrointestinal and laparoscopic surgical procedures, I am performing upper and lower gastrointestinal diagnostic and therapeutic endoscopies. From September 2003 to August 2006, and as I was appointed the Chairman of Department of Surgery, School of Medicine-Jordan University of Science & Technology, I developed a plan to improve and promote the department and improve the way of conducting the examination for the student and surgical trainee. When I was appointed as the Chairman of A&E Department at King Abdullah University Hospital, School of Medicine-Jordan University of Science & Technology during 2000-2003, I headed a committee, which established the policy and protocols for the A&E Department and the Disaster plan for the hospital.

	and Emergency		Accident & Emergency Dept Abu Dhabi-UAE This A&E Department is the busiest in the United Arab Emirates, seeing over 300 emergencies per day. My duties involved assessing and managing emergency cases
1st July 1987 to 31 st December 1988	SHO General Surgery	in	Central Hospital Mr. N. Kazi Unit Abu Dhabi-UAE Gained experience in acute and elective General Surgery
1 st January 1989 to 30 th June 1989	SHO Urology	in	Central & Al-Jazeera Hospitals Mr. Badry Alsaleh Unit Abu Dhabi-UAE Management of acute and elective admissions, and learning the basics of Urological surgery
1 st July 1989 to 25 th June 1993	Registrar General Surgery	in	Central & Al-Jazeera Hospitals Mr. N. Kazi, Mr. M. Aldoori Mr. AK Hadi Abu Dhabi-UAE

The Central and Al-Jazeera Hospitals, in Abu Dhabi, have very busy, active surgical units, receiving all types of emergencies including a lot of trauma. These two hospitals are one complex consisting of over 700 beds with all the diagnostic and treatment facilities, including a fully equipped general and specialist Radiological Department with CT scanners, Ultrasound and Nuclear Medicine Services. The complex has an active undergraduate and postgraduate surgical teaching unit. Primary and final F.R.C.S. courses are regularly conducted here as programmed by The Royal College of Physicians and Surgeons of Glasgow. The Part A and Part B of the F.R.C.S. examination have been held here every year for the last 14 and 11 years respectively. During my three and a half years as an SHO and my four years as a Registrar in this complex I gained a wide experience in managing acute and elective admissions. I was trained to perform many surgical procedures including open cholecystectomy and thyroidectomy and actively participated in the postgraduate seminars and teaching. I developed an interest in Upper Gastrointestinal Surgery and decided to move to the United Kingdom for further training.

Leeds University
Professor Chris Wild

I gained a lot of clinical and research skills in this internationally recognized gastro-intestinal unit. I learnt the technique of DNA extraction, polymerase chain reaction, and immunohistochemistry. I conducted a clinical and molecular research concerning the etiology and surveillance of Barrett's esophagus. I investigated some of the molecular markers expressed in esophageal adenocarcinoma. Among the markers, which I investigated, are the epidermal growth factor, epidermal growth factor receptors, glucose transporter 1, and cyclin D1. In addition, I investigated the prevalence of short segment of Barrett's and its associated risk of carcinoma, and the cost effectiveness of surveillance. I found that the cyclin D1 is a useful early marker in the process of malignant progression from columnar metaplasia to esophageal adenocarcinoma. My group of patients with Barrett's esophagus was 597 patients, which is one of the largest series in the world. This research was submitted to Research School of Medicine - Leeds University as a thesis for M.D. degree, which I was awarded in 2002. My research about the cyclin D1 as an early marker for esophageal adenocarcinoma has been published in the Journal of the National Cancer Institute. The Barrett's surveillance work has been published in the European Journal of Gastroenterology & Hepatology and the World Journal of Gastroenterology.

Research Interests

My main interests are in the fields of upper gastrointestinal surgery, Medical education, and Oncology, particularly gastroesophageal malignancies, gastrointestinal stromal tumors, soft tissue tumors, and peritoneal surface tumors.

Upper gastrointestinal surgery and oncosurgery are my major subspecialty with special interest in esophageal surgery, Barrett's esophagus, gastric and other intra-abdominal tumors. Esophageal and gastric cancers are my main clinical interest. My focus of the esophageal cancer research is on the investigation of the molecular changes during the multistep malignant progression of columnar-lined (Barrett's) esophagus. One of the current research projects is investigating the role of cyclin E expression in esophageal cancer. The study on glucose transporter is also underway for esophageal cancer research. I am also involved in the research to elucidate the prognostic factors in gastric cancer patients. My main focus of research is the inquiry of carcinogenesis in the stomach cancer, which is concentrated on the cell cycle molecules, eg p21 and p27, and H. pylori. I am investigating the role of different cyclins in the multistage tumorigenesis of gastric cancer and the correlation between the expression of cyclins and the degree of histologic aggressiveness and prognostic indices in patients of gastric carcinoma. At the moment I am investigating the gastric carcinoma in Northern Jordan with regards to the expression of a panel of tumor markers including cyclin E, p21, p27, p53 and EGFR. Also I am investigating the relationship of H. pylori to gastric adenocarcinoma and type of H. pylori strains in Jordan. My future research topics are prognostic molecular markers for gastric adenocarcinomas. Another research field is to evaluate the possibilities of combining many molecular markers as a prognosticator for gastric cancer.

Furthermore, I have participated in the development of Bioethics curriculum in the Faculties of Medicine and Nursing at the Hashemite University starting first semester 2011-2012

Administrative Experience

1. Vice President for Health Faculties and Health Centers, Hashemite University from 1st November 2010 to date
2. Dean, Faculty of Medicine, Hashemite University from 1st November 2010 to date
3. Dean, Faculty of Medicine, Jordan University of Science and Technology from 1st September 2008 to 31th October 2010
4. Vice Dean, Faculty of Medicine, Jordan University of Science and Technology from 1st September 2007 to 31st August 2008
5. Examiner for the Royal College of Surgeons, Ireland 2009
6. Member of the Higher Executive Committee of the Jordanian Medical Council from 1st September 2009 to 31th August 2010
7. Member of the Postgraduate Higher Committee of the Jordanian Medical Council from 1st November 2010 to date
8. Member of the Higher Committee of the Jordanian Food and Drug Agency from 1st September 2010 to date
9. Member of the National Committee for National Health Research Priorities from 1st February 2009 to date.
10. Chairman of the scientific committee of the Jordanian Board for Surgery from 1-7-2008.
11. Chairman of the Department of Surgery, King Abdullah University Hospital, Faculty of Medicine-Jordan University of Science and Technology from 1st September 2007 to date.
12. Chairman of the Department of Surgery, King Abdullah University Hospital, Faculty of Medicine-Jordan University of Science and Technology from 1st September 2003 to 31st August 2006.
13. Chairman of A&E Department, King Abdullah University Hospital, Faculty of Medicine-Jordan University of Science and Technology from September 2000 to 31st August 2003.
14. Chairman of the Pan Arab Gastrointestinal Cancer group, Medical Arab Association against Cancer.
15. Chairman of the Operation Theaters Committee, King Abdullah University Hospital, Faculty of Medicine-Jordan University of Science and Technology from 1st September 2003 to 31st August 2006.
16. Chairman of the Medical Research Committee, King Abdullah University Hospital, Faculty of Medicine-Jordan University of Science and Technology from 1st September 2004 to 31st August 2006.
17. Main organizer for the first and final Arab Board Exam in General Surgery (Jordan Center) from September 2004 to date.

18. Program Director for the Arab Board of surgery in the Faculty of Medicine, Jordan University of Science and Technology from 1st September 2006 to date.
19. Member of the Training and Recognition committee for the Arab Board of surgery, Damascus-Syria from 1st September 2006 to date.
20. Active member of the committees, which established our new hospital (the 635-bed, King Abdullah University Hospital). I was actively involved in the establishment of the policy and protocols for the new hospital, including the dry and soft run of the hospital in the initial period before and after receiving the patients. In addition I established the Disaster plan for the hospital.
21. Member of the scientific committee for Arab Board for emergency medicine since 2002.
22. Member of the scientific committee of the Jordanian Board for Surgery from 2005 to date.
23. Member of the scientific committee of the Jordanian Board for Emergency medicine from 2001 to 2005.
24. Member of the Faculty of Medicine Council, Jordan University of Science & Technology from 2000 to 2010.
25. Organizer for the Introductory Course to Medicine for the fourth year Medical Student since 1998.
26. Councilor for the sixth year Medical Student since 1998.
27. Organizer for the final MB, Ch B. Exam School of Medicine, Jordan University of Science & Technology from 1998 to 2010.
28. Member of many Tender Committees for buying surgical instruments, endoscopes, Laparoscopes, and disposable items for King Abdullah University Hospital. School of Medicine, Jordan University of Science & Technology from 1998 to date.
29. Member of the committee for the Integrated Medical Curriculum. School of Medicine, Jordan University of Science & Technology from 2000 to date.
30. Member of the Research Committee. School of Medicine, Jordan University of Science & Technology from 2000 to 2002.
31. Member of the scientific committee for the Medical Arab Association against Cancer.
32. Member of the Pan Arab Breast Cancer group, Medical Arab Association against Cancer.

Civic and Philanthropic Activities

Educator for the local community through the Jordanian Medical Association and I actively participate in the free medical days for the local community

Reviewer and/or advisory board for Medical Journals or textbook

1. Member of the Advisory Panel for the textbook of Henry & Thompson's Clinical Surgery

2. Regional Editor for the Croatian Medical Journal

Supervision of Postgraduate Students

In addition to training and supervising the Surgical Residents at King Abdullah Teaching Hospitals towards the Certificate of Higher Surgical Specialty, I supervised or served as a co-advisor for the following Master Thesis:

1. A study of Factors Affecting the Prevalence of Peptic Ulcer disease in Northern Jordan. (Student name: Fakery AM Al-Sharu; Student number: 9508216). Master degree awarded June **1999** (Yarmouk University).
2. The Prevalence of Food Cobalamin Malabsorption in Chronic Gastritis Caused by H. pylori in Northern Jordan. (Student name: Khalid AZ Ahmed; Student number: 98012620). Master degree awarded August **2000**.
3. Molecular Markers in Gastric cancers in Northern Jordan. (Student name: Hanan N Karam). Master degree awarded June **2001**.
4. Polymorphism of p53 gene in Jordanian population and possible association with breast cancer and lung adenocarcinoma. (Student name: Suzan Abdul-Hafiz). Master degree awarded August **2003**.
5. P53 expression in Jordanian population and in patients with colorectal carcinoma (Student name: Yasmine Thenat). Master degree awarded January **2004**.
6. Genotypes of Helicobacter pylori prevalent among Jordanian patients with gastritis (Student name: Marwa Fareed Ibrahim; Student number: 20023012011). Master degree awarded December **2004**.
7. Cyclin E, p21, and p53 alterations in ovarian cancer (Student name: Amal Zahran; Student number: 20023093006). Master degree awarded June 2005.
8. Cyclin E, p21, and p53 alterations in gallbladder cancer (Student name: Mouroj Ziadeh; Student number: 20023093003). Master degree awarded September **2005**.
9. Cyclin E, p21, and p53 alterations in breast cancer (Student name: Mohammed Hafez; Student number: 20033093007). Master degree awarded February **2007**.

10. Cyclin E, p21, and p53 alterations in colorectal cancer (Student name: Barakat Fungan; Student number: 20029330002). Master degree awarded February **2008**.
11. Clinicopathological characteristics and prognostic factors for gastric adenocarcinoma in north Jordan. (Student name: Raed Mahasneh; Student number: 20073018007). Master degree awarded February **2010**.

Workshops and Courses Attended

1. Teaching and Assessment of Communication Skills. Workshop organized by Iowa University (USA) and JUST. Irbid, Jordan 13-14 January 2010.
