- Member of the Graduate Studies Committee.
- Member of the Study Plan Committee.
- Member of Academic Accreditation Committee.
- Member of the Hashemite University Employees Club.
- Undergraduate students’ guidance.
- Exams committee.

2014 – 2016, University of Nizwa

- Undergraduate advising committee.

- Exams committee.
- Field visit committee.

Course and Curriculum Development

A) AT THE HASHEMITE UNIVERSITY

Course Development & Revision

ECO 211 Microeconomic Theory I.

ECO 311 Microeconomic Theory II.

ECO 315 Managerial Economics.

An inclusive revision of these courses was made including a new catalog description. New textbooks were selected and examined under my guidance that better support our students and program, and a detailed syllabus developed for each course so these courses better fit into the new undergraduate catalog. The better the student understand this material, the better she will do later.

B) AT UNIVERSITY OF NIZWA

New Course Development & Teaching

BUSI 205 Technical Writing for Business Course – Developed content and description for the course as part of a Business major concentration within our undergraduate curriculum. This course provides students by skills of business writings.

SPLT 300 Special Topics Course – Developed content and select some special topics about “How to write research paper” that help students to write research plan and research proposal in the field of Economics and Business Administration.

SPLT 111 Seminar Course – Developed content that provides students with the appropriate skills and methods of conducting, planning, and writing their research. Guide them to write a full research paper during the semester and ask them to present their work.

Teaching

Teaching Philosophy

My teaching goal, in short, is to instill in the student a strong fundamental background of the subject, as well as problem solving strategies and abstract thinking skills. This is achieved by conveying basic knowledge of the subject and incorporating problem solving scenarios during lectures, homework, exams, and in-class assignments. Instead of asking students to regurgitate textbook material, application of learned knowledge to given problem situations is preferred. This requires students to integrate newly gained knowledge of the subject and apply it to a real problem. This also supports independent and abstract reasoning, since the student is challenged to critically analyze the problem, use their knowledge to solve the problem, and build on that knowledge for the future.

I believe, each and every student must take an active role and ownership over their learning. This requires time, focus, effort and attention of the student. Learning can be self-directed but should also be facilitated by the course curriculum and through my support and encouragement. My

purpose is to create a classroom environment where students are free to develop professionally and personally. The objective of any course is to provide student with a foundation of knowledge and skills that is readily transferable to her subsequent coursework at the university. I would like to work with students on a case-by-case basis but must ensure consistency and fairness to all students.

Teaching Experience (Courses taught)

Microeconomic Theory II	The Hashemite University
