TEACHING EXPERIENCE

Assistant professor. Faculty of Nursing, Hashemite University/ Jordan. 28/01/2018 until now.

Duties:

- Taught nursing courses: Paediatric nursing theory and clinical, growth and development, health education, and reproductive health.
- Participated in the research and administrative activities in the faculty.

Lecturer (Full Time). Faculty of Nursing, King Saud University/ Saudi Arabia. 8/3/2007-21/12/2012.

Duties:

- Taught nursing courses: Paediatric nursing, anatomy & physiology, microbiology, nutrition, & medical surgical nursing.
- Supervised nursing students' clinical training in their hospitals.
- Participated in the research and administrative activities in the faculty.

RESEARCH EXPERIENCE

PhD Student. University of Hull – (September, 2017)

The PhD research employed an adapted form of grounded theory, designed to investigate paediatric nurses' views and experiences concerning infection control practice. Data were

collected through the use of 'face-to-face' semi-structured interviews. In my PhD I completed many modules in both qualitative and quantitative research, and attained Certificate and Diploma in Research.

Clinical research co-ordinator. King Hussein Cancer Center (KHCC)/ Jordan. 24/5/2006-7/3/2016

Duties:

- Coordinating research for the Cancer registry and clinical research department
- Extracted patient data from patient files and/or hospital information system and patient recruitment.
- Coordinated with physicians & nurses to establish a system for information flow as needed by each study.
- Entered collected data into database systems or paper forms.
- Collaborated with data managers and statisticians to facilitate research activities.
- Helped the investigator to complete the clinical study correctly by assuring compliance with the protocol, study procedures, and handle daily clinical trials activities and plays a critical role in study conduct.

Site administrator of "Paediatric Oncology Network Database" (POND), an online database program provided by St. Jude Children's Research Hospital and designed to obtain information of paediatric oncology cases for cancer registry and research purposes (www.pond4kids.org).

Projects:

- A prospective Study "the effectiveness of chemotherapy protocol used to treat newly diagnosed patients with acute promyelocytic leukemia."
- A retrospective Study about lymphoma (Hodgkin's & Non-Hodgkin's lymphoma).
- Acute Lymphocytic leukemia registry (data collection) & BMT study (data collection).
