European Conference on

CIRCUIT THEORY AND DESIGN

5 — 8 September 1989

Organised by the

Electronics Division of the Institution of Electrical Engineers

In association with the

Institute of Electrical and Electronics Engineers Inc.

Venue

University of Sussex, Brighton, United Kingdom

Organising Committee

Professor J K Fidler (Chairman)
Dr P Bowron
Dr B M G Cheetham
Dr A D P Green
Dr M C Hall
Professor L J Herbst
Dr D H Horrocks
J B Hughes
Professor J I Sewell
Dr R S Soin
Dr J N Torry

Technical Committee

Professor K J Antreich
Professor Y Attikiouzel
Dr M Bellanger
Professor M Bialko
Professor M Biey
Professor E Bolinder
Professor R K Brayton
Professor L T Bruton
Professor T Deliyannis
Professor K Géher
Professor R L Geiger
Professor R Horvat
Professor W K Jenkins
Professor E Lindberg
Professor A Mateescu
Professor W Mecklenbräuer
Professor M Medeiros Silva

Professor M Milic
Professor S K Mitra
Professor G S Moschytz
Professor Y Neuvo
Dr R Nouta
Professor J Osowski
Professor A Petrenko
Professor E Sanchez-Sinencio
Professor J O Scanlan
Professor A S Sedra
Professor I Shirakawa
Professor M A Styblinski
Professor G C Temes
Professor Y Tokad
Professor J Vandewalle
Professor J Vlach
Professor V Zima

Published by the Institution of Electrical Engineers, London, ISBN 0 85296383 1 ISSN 0537-9989.

"All Rights Reserved. No part of this publication may be produced, stored in a retrieval system, or transmitted in any form or by any means – electronic, mechanical, photocopying, recording or otherwise – without the prior written permission of the publisher."

Author Disclaimer

"While the author and the publisher believe that the information and guidance given in this work are correct, all parties must rely upon their own skill and judgment when making use of it. Neither the author nor the publisher assume any liability to anyone for any loss or damage caused by any error or omission in the work, whether such error or omission is the result of negligence or any other cause. Any and all such liability is disclaimed."

Conditions of Acceptance of Advertisements

The Institution reserves the right to refuse to insert any advertisements (even if ordered and paid for) and/or to make alterations necessary to maintain its standards.

It is not guaranteed that any advertisement will be placed in any specified position or on any specified page unless agreement has been entered into and the agreed surcharge paid.

Every effort will be made to avoid errors but no responsibility will be accepted for any mistakes that may arise in the course of publication of any advertisement. These mistakes may include non-insertion, insertions other than those ordered and errors and omissions within the advertisement.

Notice to cancel any advertisement must be received in writing ten days prior to its next scheduled appearance, otherwise a charge will be made.

No responsibility will be accepted for repetitive errors unless the advertiser's correction has been accepted in respect of that error.

No responsibility will be accepted for loss or damage alleged to arise from errors within advertisement copy, non-appearance of an advertisement or delay in forwarding box number replies.

Advertisers are required to ensure that the content of advertisements conforms with all legislation currently in force affecting such matters. They shall further indemnify the publisher in respect of any claims, costs and expenses that may arise from anything contained within the advertisement and published on their behalf by the Institution of Electrical Engineers.

The placing of an order or contract for insertion of an advertisement in any newspaper or journal published by the Institution of Electrical Engineers whether in writing or by verbal or telephone instructions will be deemed an acceptance of each and all of the above conditions.

Contents

The Institution of Electrical Engineers is not, as a body, responsible for the opinions expressed by individual authors or speakers.

Page No.

SESSION 1A – DIGITAL FILTERS I

- 1 **'Design of wave digital filters with prescribed magnitude and phase requirements'**
S S Lawson and A P S Jones
University of Warwick, UK
- 6 **'Design method of FIR digital filters with arbitrary passband by using interpolation techniques'**
K Kitamura, M Ikehara, S Takahashi
Keio University, Japan
- 11 **'On the approximation of analog systems with digital filters'**
A Zalnieriunas
Ruhr Universität Bochum, Federal Republic of Germany
- 16 **'Realisable Chernoff bound filters for digital optical transmission'**
J J O'Reilly, and L R Watkins
University of Wales, Bangor, UK
K Schumacher
ANT Nachrichtentechnik GmbH, Federal Republic of Germany

SESSION 1B – SC FILTERS AND NETWORKS I

- 21 **'Generalised switched capacitor simulation of LCR ladder filters employing state space methods'**
J T Taylor and D G Haigh
University College London, UK
- 27 **'The twintor in bandstop switched-capacitor ladder filter realisation'**
L I Ping and J I Sewell
University of Glasgow, UK
- 32 **'The design of switched capacitor filter circuits for GaAs MSI technology'**
D G Haigh, A K Betts, K Steptoe and J T Taylor
University College London, UK
- 37 **'Narrowband switched-capacitor filter design using the interpolated finite impulse response approach'**
A Petraglia and S K Mitra
University of California, USA

SESSION 1C – CAD: SIMULATION

- 42 **'Hierarchical solution of linear algebraic equations on transputer trees for circuit simulation'**
T J Kazmierski and Y Bouchlaghem
University of Southampton, UK
- 46 **'A multirate algorithm for fast circuit simulation'**
H C Neto and L M Vidigal
INESC/IST, Portugal

SESSION 2A – DIGITAL FILTERS II

- 51 **'Realization of non finite extent quadratic digital filters'**
B G Mertzios
University of Thrace, Greece
G L Sicuranza
University of Trieste, Italy
- 55 **'Design of long FIR-equalizers in the frequency domain'**
H Gaunholt and E W Rasmussen
Technical University of Denmark, Denmark
- 60 **'Efficient continuous-spectrum analysis based on sweep-filtering technics'**
F B Frederiksen
University of Aalborg, Denmark
- 64 **'Analysis of digital filtering algorithms implemented with signal processors'**
M Bleja
Poznan University of Technology, Poland

SESSION 2B – NEURAL NETWORKS

- 68 **'A novel approach to VLSI routing using neural networks'**
A D P Green and P D Noakes
University of Essex, UK
- 73 **'A VLSI neural network with capacitive synapses'**
M Verleysen, D Martin and P Jespers
Catholic University of Leuven, Belgium
- 78 **'Neuro-chip: an analog approach to an artificial adaptive neural network'**
L M Reyneri and P Bagero
Politecnico di Torino, Italy
E Pasero, G Pignari and G Subiaco
Il Università degli Studi di Roma, Italy

SESSION 2C – CAD: MODELLING

- 84 **'Detailed extraction of distributed networks and parasitics in IC designs'**
H B Lundén
Swedish Institute of Microelectronics, Sweden
- 89 **'A consistent model for the wiring delay of the MOS inverter'**
C A Marinov
Polytechnical Institute of Bucharest, Romania
P Neittaanmäki and V Hara
University of Jyväskylä
Finland
- 94 **'An efficient method for modelling VLSI interconnections'**
H Nelis, E Deprettere and P Dewilde
Delft University of Technology, The Netherlands
- 99 **'Identification of small-signal transistor models'**
J Vidkjaer
Technical University of Denmark, Denmark

SESSION 3A – DSP I

- 104 **'Optimum and sub-optimum scheduling of DSP algorithms'**
M Afghahi
Linköping University, Sweden
- 109 **'Minimum distance receivers for signal detection and parameter estimation'**
A Mertins and N Fliege
Technical University of Hamburg, Federal Republic of Germany
- 114 **'Least-squares multichannel filters in colour image restoration'**
G Angelopoulos and I Pitas
University of Thessaloniki, Greece
- 118 **'An improved algorithm for border following of binary images'**
T D Haig and Y Attikiouzel
University of Western Australia, Australia

SESSION 3B – CT FILTERS AND NETWORKS I

- 123 **'Mosfet-capacitor continuous filter with composite operational amplifiers'**
A Urbas and J Osowski
Warsaw University of Technology, Poland
- 128 **'Modelling of nonideal active devices in continuous-time OTA-C filters'**
P Bowron and H M Dahir
University of Bradford, UK
- 132 **'A new compensated integrator structure with differential difference amplifier and its application for high frequency MOSFET-C filter design'**
Z Czarnul
Technical University of Gdansk, Poland
- 137 **'DC offsets in analogue adaptive IIR filters'**
D A Johns, W M Snelgrove and A S Sedra
University of Toronto, Canada

SESSION 3C – NONLINEAR AND CHAOTIC SYSTEMS I

- 142 **'Remerging bifurcation sequences in an autonomous electronic circuit'**
M J Ogorzalek
Ecole Polytechnique Federale de Lausanne, Switzerland
- 147 **'Canonical representations of piecewise-affine circuits'**
C Güzelis and I C Gökner
Technical University of Istanbul, Turkey
- 152 **'Chaos via torus breakdown in a forced oscillator including a diode'**
N Inaba
Utsunomiya University, Japan
S Mori
Keio University, Japan
- 157 **'Chaotic phenomena in a four-dimensional circuit with two ideal diodes'**
Y Nishio and S Mori
Keio University, Japan
N Inaba
Utsunomiya, Japan

SESSION 4A – DSP ARCHITECTURES I

- 162 **'A high-speed bit-serial processing element'**
P Ingelhag, B Jonsson, B Sikstrom and L Wanhammar
Linköping University, Sweden
- 166 **'Type-handling in bit-true silicon compilation for DSP'**
M Pauwels, F Catthoor, D Lanneer and H DeMan
Catholic University of Leuven, Belgium
- 171 **'Implementation of parallel (p,q) counters for high-speed array multipliers'**
B Maden, University of Malaya, Malaysia
C G Guy
University College London, UK
- 176 **'Differential pass-transistor logic partial-product generator for iterative multipliers'**
J H Pasternak and C A T Salama
University of Toronto, Canada
- 180 **'A carry save architecture for primitive operator digital filters'**
D R Bull and D H Horrocks
University of Wales College of Cardiff, UK

SESSION 4B – SC FILTERS AND NETWORKS II

- 185 **'Switched-capacitor self-oscillating capacitance transducers with duty-cycle or digital output'**
A Cichocki, Warsaw Technical University, Poland
R Unbehauen
Universität Erlangen Nürnberg
Federal Republic of Germany
- 190 **'SCORE – computer analysis of switched capacitor networks containing resistors'**
A Somogyi
Computer & Automation Institute of the Hungarian Academy of Sciences, Hungary
L Tóth and E Simonyi, Research Institute for Telecommunication, Hungary
- 195 **'Unity-gain buffer based switched-capacitor biquads'**
L Kunsagi and T Fulop
Technical University of Budapest, Hungary
- 199 **'On computer simulation of integrated switched capacitor circuits'**
D G Haigh
University College London, UK
C Toumazou, Imperial College London, UK

SESSION 4C – DATA CONVERTERS

- 205 **'Improved dynamic linearity in multi-level $\Sigma - \Delta$ converters by spectral dispersion of D/A distortion products'**
W Redman-White and D J L Bourner
University of Southampton, UK
- 209 **'Practical design considerations for high performance MOS $\Sigma - \Delta$ A/D converters using cascaded second-order $\Sigma - \Delta$ sections'**
Q Huang
University of East Anglia, UK

- 214 **'A novel fast high resolution ADC-structure'**
F Viehböck and H Fürst
Technical University Vienna, Austria
- 218 **'Design of an A/D converter using complementary three-input amplifiers'**
C P Chong, K C Smith and Z G Vranesic
University of Toronto
Canada
- 223 **'Fourth order sigma-delta modulator circuit for digital audio and ISDN applications'**
T Karema, T Ritoniemi and H Tenhunen
Tampere University of Technology, Finland

SESSION 5A – DIGITAL FILTERS II

- 228 **'Analysis of fixed point roundoff effects in transform domain LMS adaptive filters'**
W K Jenkins and J K Yun
University of Illinois, USA
- 233 **'Roundoff noise properties of lattice filters employing floating-point arithmetic'**
Bing Zeng and Y Neuvo
Tampere University of Technology, Finland
- 238 **'The frequency variation of response errors in fixed and floating point FIR filter'**
D H Horrocks and D R Bull
University of Wales College of Cardiff, UK
- 242 **'Design of narrow band filters using sampling rate alterations'**
M F Fahmy, A El Wardany and N El-Gayed, University of Assiut, Egypt
M I Sobhy
University of Kent, UK

SESSION 5B – SC FILTERS AND NETWORKS III

- 247 **'From LC-ladder and unit-element filters to SC-networks'**
A Limperis and I Haritantis
University of Patras, Greece
- 252 **'Two-dimensional SC filters with circularly symmetric response'**
A Handkiewicz
Technical University of Poznan, Poland
- 256 **'By-inspection signal-flow graph analysis of general switched-capacitor networks'**
G S Moschytz
Swiss Federal Institute of Technology, Switzerland
A Dabrowski, Technical University of Poznan, Poland

SESSION 5C – CAD: TIMING ANALYSIS AND SIMULATION

- 261 **'Group delay as an estimate of delay logic'**
I Talkhan, J Vlach, J Barby and A Vannelli
University of Waterloo, Canada
- 265 **'Calculation of clock path delay and skew in VLSI synchronous systems'**
M Afghahi and C Svensson
Linköping University, Sweden

270 **'A logical timing simulator for CMOS circuits based on an accurate formulation of the propagation delay'**
M Bafleur and J Buxo
LAAS (CNRS), France
I C Teixeira and J P Teixeira
INESC, CEUTL (INIC), Portugal

275 **'Posynomial delay models for optimization – based transistor sizing in digital CMOS VLSI circuits'**
B Hoppe, O Kiehl, T Huber, D Schmitt-Landsiedel and G Neuendorf
Seimens, Federal Republic of Germany
V Eisele, Technical University of Munich, Federal Republic of Germany

SESSION 6A – GENERAL FILTER DESIGN

280 **'Low sensitivity selective linear phase in switched-capacitor filters with controlled group delay'**
M F Fahmy and M Abo-Zahhad, University Assuit, Egypt
M I Sobhy,
University of Kent, UK

284 **'Arbitrarily precise equalization of the phase of linear analogue systems'**
A Kummert
Ruhr-Universität Bochum, Federal Republic of Germany

289 **'A design program for digital and analogue filters: PANDDA'**
R K Henderson, L I Ping and J I Sewell
University of Glasgow, UK

294 **'A simple design program for optimal anti-aliasing filters'**
M Markiewicz-Wrzeciono and P Sniatala
Poznan University of Technology, Poland

SESSION 6B – AMPLIFIERS AND OSCILLATORS

299 **'Large signal comparative modelling and characterization of GaAIAs HEMT GaAs MESFET and Si bipolar transistor microwave oscillators'**
J F Sautereau, C Utard and J Graffeuil
LAAS-CNRS, France
C Lenaour, CESR-CNRS, France

304 **'Two pole, high speed operational amplifier modelling methods and techniques'**
C A Makris and C Toumazou
Imperial College, UK

309 **'An improved characterisation technique for amplifiers used in high-speed switched-capacitor circuits'**
A K Betts, J T Taylor and D G Haigh
University College London, UK

315 **'A novel class AB current amplifier, design and application'**
C Toumazou and M Yang
Imperial College, London, UK
F J Lidgley
Oxford Polytechnic, UK

SESSION 6C – CAD: LAYOUT

- 319 **'A system for hierachical constraint graph generation and graph compaction for symbolic layout'**
A A J de Lange, J S J de Lange, J F Vink
Delft University of Technology, The Netherlands
- 324 **'An expert system for mask pattern generator of CMOS logic cells'**
I Shirakawa, Osako University, Japan
S Tsukiyama and S Shinoda, Chuo University, Japan
A Yamada and T Kambe, Sharpe Corporation, Japan
- 329 **'A flexible system for mask-level routing'**
M F Sharpe and R J Mack
University of Essex, UK
- 334 **'Exploiting parallelism in routing for a hierarchical VLSI design environment'**
V K Sagar and R E Massara
University of Essex, UK

SESSION 7A – MEDIAN FILTER

- 339 **'An integrated bit-serial 9-point median chip'**
K Chen
Linkoping University, Sweden
- 344 **'Median filtering with edge enhancement properties'**
S Fotopoulos
University of Patras, Greece
- 349 **'Median filtering by a generalized threshold decomposition'**
S K Mitra and M Petraglia
University of California, USA
L Onural
Bilkent University, Turkey
- 354 **'Statistical properties of median, weighted median and stack filters'**
O Yli-Harja, Technical Research Centre of Finland, Finland
J Astola, Tampere University, Finland
Y Neuvo, Tampere University of Technology, Finland

SESSION 7B – ACTIVE FILTERS

- 358 **'On the formation of transmission zeros in operational simulation circuits'**
G W Roberts and A S Sedra
University of Toronto, Canada
- 363 **'A gain-compensated active circuit for higher-frequency delay equalisation'**
P Bowron and A A Daaboul
University of Bradford, UK
K V Castor-Perry, Kemo Ltd, UK
- 368 **'A new bi-quadratic RC-active all-pass filter configuration'**
J A Debosz and H Madsen
Bruel and Kjaer, Denmark

- 372 **'Searching for TAC filter structures using rule-based system'**
H Budzisz
Technical University of Koszalin
Poland

SESSION 7C – NONLINEAR AND CHAOTIC SYSTEMS II

- 376 **'Multilevel oscillations and chaos'**
P Grabowski
Academy of Mining and Metallurgy, Poland
M J Ogorzalek
Ecole Polytechnique Federal de Lausanne, Switzerland
- 381 **'Stability robustness with respect to resistances of a class of singular nonlinear circuits'**
M M Milić
University of Belgrade, Yugoslavia
V B Bajić, Institute of Nuclear Sciences 'Boris Kidric', Yugoslavia
- 385 **'Variable dimension algorithms for solving nonlinear resistive circuits'**
J Vanderwalle
Catholic University of Leuven, Belgium
L Vandenberghe, NFWO, Belgium
- 390 **'Time domain testing of large nonlinear circuits'**
J A Starzyk and H Dai
Ohio University, USA

SESSION 8A – DSP ARCHITECTURES II

- 395 **'Computational ordering of digital networks under pipeline constraints and its application to compiler for DSP's'**
N Sugino, S Ohbi and A Nishihara
Tokyo Institute of Technology, Japan
- 400 **'Evaluation of some multiprocessor scheduling techniques of atomic operations for recursive DSP filters'**
S M Heemstra de Groot and O E Herrmann
University of Twente, The Netherlands
- 405 **'Subtractive floating-point division and square root for VLSI DSP'**
C C Stearns
LSI Logic Corporation, USA
- 410 **'The design of a 50 Mflop arithmetic chip for massively parallel pipelined DSP algorithms: the floating point pipeline CORDIC processor'**
A A J de Lange, A J van der Hoeven, E F Deprettere, P Dewilde, and J Bu
Delft University of Technology, The Netherlands

SESSION 8B – MULTI-DIMENSIONAL SYSTEMS

- 415 **'Design of 2-D quadratic filters using their bi-impulse responses'**
G Ramponi
University of Trieste, Italy
- 420 **'A new class of 2-D digital filters composed of allpass subfilters'**
H Toyoshima, M Ikehara and S I Takahashi
Keio University, Japan
- 425 **'A VLSI implementation of multidimensional digital signal processing'**
M B E Abdelrazik
Brunel University, UK
- 430 **'On the adaptive algorithm and its convergent rate improvement of 2-D lattice filter'**
H Moro, T Watanabe, A Taguchi and N Hamada
Keio University, Japan
- 435 **'A 2-dimensional version of the matrix pencil method to solve the DOA problem'**
P F C Krekel and E Deprettere
Delft University of Technology, The Netherlands

SESSION 8C – NONLINEAR AND CHAOTIC SYSTEMS III

- 440 **'Application of chaotic switched-capacitor circuits for random number generation'**
S Espejo-Meana, A Rodriguez-Vazquez, J L Huertas and J M Quintana
University of Seville, Spain
- 445 **'Complementary transformation in mildly nonlinear feedback systems'**
A Borys and N Fliege
Technical University of Hamburg-Harburg, Federal Republic of Germany
- 448 **'Prediction of autonomous nonlinear oscillations in multiple-loop active-RC networks using the Hopf bifurcation theorem'**
P Bowron, M R J Motlagh and R G Cameron
University of Bradford, UK
- 452 **'Programmable piece-wise linear function synthesizers using operational transconductance amplifiers'**
B Linares-Barranco, J Ramirez-Angulo and E Sanchez-Sinencio
Texas A & M University
A Rodriguez-Vazquez, University of Seville, Spain
- 457 **'Stability of resonant circuits with nonlinear elements'**
A Baranyi
Research Institute for Telecommunication, Hungary

SESSION 9A – DIGITAL FILTERS IV

- 462 **'A multifunction FIR filter for delta modulated signals'**
V Anastassopoulos, T Deliyannis and S Horianopoulos
University of Patras, Greece
- 467 **'Design of three-dimensional spherically symmetric IIR digital filters with real and complex coefficients using spectral transformations'**
T Sekiguchi, S Takahashi and K Matsuda
Keio University, Japan

472 **'Simultaneous approximation for bireciprocal lattice wave digital filters'**
F Leeb
Ruhr Universitat, Federal Republic of Germany
T Henk
Research Institute for Telecommunication,
Hungary

447 **'Direct design method of high order digital filters'**
E M Saad, M I El-Adawy, E Shafei
University of Helwan, Egypt

SESSION 9B – SC FILTERS AND NETWORKS IV

482 **'Examination of the eigenvalues of ideal SC circuits based on state equation approach'**
L Tóth and E Simonyi
Research Institute for Telecommunication, Hungary

487 **'A parameter identification approach to fault diagnosis of switched capacitor circuits'**
A E Salama
Kuwait University, Kuwait
F Z Amer, E M Saad
University of Helwan, Egypt
K A Albidweihy, Cairo University, Egypt

492 **'Speech recognition algorithm based on switched capacitor network system'**
H Takase, Y Horio and S Nakamura
Tokyo Denki University, Japan

497 **'Design of switched-capacitor networks with minimum number of switches and capacitors'**
A Nacaroglu and M Köksal
University of Gaziantep, Turkey

SESSION 9C – CAD: OPTIMISATION

502 **'Discreet optimisation of wave digital filters combining simulated annealing and line search method'**
L Gefferth
Technical University of Budapest, Hungary

507 **'Convergence analysis and optimisation of an iterative technique for polynomial factorisation'**
J T Taylor and D G Haigh
University College, UK
L F Lind, University of Essex, UK

512 **'Optic: a user-orientated optimisation package for IC design'**
M R Gearty
Logica BV, The Netherlands
J B Foley
Trinity College, Ireland

517 **'Drift reliability optimisation: problem formulation and its algorithmic solution'**
M A Styblinski
Texas A&M University, USA

SESSION 10A – DSP II

- 522 **'A new idea for speech waveform coding using vector quantization and solution to the matching problem in L_{∞} norm'**
A K Nandi, I Dologlou and A G Constantinides
Imperial College, London, UK
M F Abdurden, Bucknell University, USA
- 527 **'Transparent frequency domain coding of speech, a possible candidate for audio coding in the videophone'**
P Morley and J A Stemerding
PTT Research, The Netherlands
- 532 **'TDD-filtering and demodulation in acoustically coupled modem'**
E Klier, J Hruby and M Oklusky
Czechoslovak Academy of Sciences, Czechoslovakia
- 537 **'Iterative parameter optimisation techniques for parallel-formant encoding speech'**
A Lowry, M C Hall and P M Hughes
British Telecom Research Laboratories, UK

SESSION 10B – GENERAL CIRCUITS AND SYSTEMS I

- 542 **'Phase spaces from experimental time series'**
R Jones and D S Broomhead
Royal Signals and Radar Establishment, UK
- 547 **'On a dynamical linear-flowgraph description'**
Z Kowalczyk
Technical University of Gdansk, Poland
- 552 **'Multidimensional piecewise linear network synthesis'**
J Brzobohatý and J Pospíšil
Technical University of Brno, Czechoslovakia
- 557 **'A general dynamical system model arising from electrical networks'**
A Szatkowski
Technical University of Gdansk, Poland

SESSION 10C – CAD: GENERAL

- 561 **'Computer aided design of a microwave MESFET DRO'**
E B L Chou, S W J Seawright, V F Fusco, J A C Stewart and A Tang
The Queen's University of Belfast, UK
- 566 **'Yield calculation by numerical hypersurface integration'**
H Somogyi
Budapest Technical University, Hungary
- 571 **'Curve-search algorithm for solving of nonlinear equations'**
A I Petrenko and A R Omer-Imerely
Kiev Polytechnical Institute, USSR
- 575 **'Digitized analog network model for the simulation of thermal systems and processes. Application to the determination of thermal diffusivity of solid materials'**
E Lopex-Baeza and J de La Rubia
University of Valencia, Spain

SESSION 11A – DSP III

- 580 **'Adaptive L-filters'**
I Pitas
University of Thessaloniki, Greece
A N Venetsanopoulos
University of Toronto, Canada
- 585 **'Adaptive equalization using the backpropagation algorithm'**
Q Zhang, L H Zetterberg, K Mossberg, S Carlsson
Royal Institute of Technology, Sweden
- 589 **'An ARMA bispectrum estimation by two estimation process approach'**
W Tanimoto, A Taguchi and N Hamada
Keio University, Japan
- 594 **'Butterfly filter banks'**
A Drygajlo
Silesian Technical University, Poland

SESSION 11B – RF CIRCUITS

- 599 **'On the local stability of uniform sampling phase-locked loops'**
M Zoltowski
Technical University of Gdansk, Poland
- 604 **'Adjacent-channel interference of a second-order PLL-FM-Demodulator'**
W Mohr
Hannover University, Federal Republic of Germany
- 609 **'Fundamental limitations of the Schottky mixer diodes in the lattice configuration'**
Z F Gunes and A Kavras
Yildiz University, Turkey

SESSION 11C — CAD: SYNTHESIS

- 614 **'A new method supporting the nominal design of analog integrated circuits with regard to constraints'**
F Pörnbacher
Technical University of Munich, Federal Republic of Germany
- 619 **'A technology independent cell generator based on graph theoretic algorithms'**
A M Finney
Brunel University, UK
- 624 **'A methodology for automated generation of analogue integrated circuits'**
C Toumazou, C A Makris, C M Berrah and P Y K Cheung
Imperial College, UK
- 629 **'Hi-Fi: an environment for the high level description and analysis of VLSI networks'**
A J van der Hoeven and A A J de Lange, E F Deprettere and P M Dewilde
Delft University of Technology, The Netherlands

SESSION 12A – GENERAL CIRCUITS AND SYSTEMS II

- 634 **'Algebraic formulas for counting spanning trees in regular multigraphs'**
J M Wojciechowski
Warsaw University of Technology, Poland
M Fellows, University of Idaho, USA
- 639 **'Distribution feeder load modelling: an approach using fuzzy sets'**
G Lambert Torres and D Mukhedkar
Ecole Polytechnique de Montreal, Canada
- 644 **'Network flow optimization by a resistor circuit'**
M Hasler and J E Nussbaumer
Swiss Federal Institute of Technology, Switzerland

SESSION 12B – CT FILTERS AND NETWORKS II

- 647 **'The nonlinear distortion of an FM signal by a passive network'**
M T Abuelma'atti
University of Bahrain, Bahrain
- 652 **'Very high precision analog trimming using floating gate MOSFETS'**
J Sweeney
Motorola Advanced Products Research and Development Laboratory, USA
R L Geiger, Texas A&M University, USA
- 656 **'An improved CMOS current mirror using a bulk-effect independent cascode biasing structure'**
M Steyaert, Catholic University of Leuven
Belgium
- 661 **'The convergence of Volterra series describing lowpass OTA-capacitor (OTA-C) filters'**
A Czarniak and S Szczepanski
Technical University of Gdansk, Poland

SESSION 12C – EXPERT SYSTEMS IN CIRCUIT DESIGN

- 665 **'Deep reasoning approach to sequential circuit fault diagnosis'**
B Rogel-Favila and P Y K Cheung
Imperial College, UK
- 670 **'Prolog-based active filters synthesis'**
K Wawryn
Technical University of Koszalin, Poland
- 674 **'CIRCOR – an expert system for fault correction of digital NMOS circuits'**
J Krol
Technical University of Gdansk, Poland
- 677 **'A prototype expert system for fault diagnosis in electronic device'**
K Wawryn and W Zinka
Technical University of Koszalin, Poland
